Responsible Care
Verantwortliches Handeln im Chemiehandel

Together with their sister company, Theo Seulberger (www.theo-seulberger.de) in Karlsruhe, A + E. Fischer-Chemie provides medium-sized businesses throughout the whole of Germany with a demand-oriented range of chemical products. The success of this business enterprise, which has existed for over 130 years, is based on its reliability, creativity and flexibility—characteristics with which customer requirements are fulfilled.

High-quality standards, generous storage, adapted transport capacities, innovativeness and the continuing dialogue with suppliers and customers create a scope for many new activities: from solutions concerning practical issues, schedules and environment in the area of special fillings, as well as container traffic, up to competent advice on equipment for overseas projects.

The distribution of an extensive assortment of special chemicals supplements our performance portfolio. A. + E. Fischer-Chemie's staff members bear the responsibility for safe storing, filling and transporting of all chemical products. Active membership in the worldwide initiative Responsible Care underlines the commitment and responsibility towards the protection of the environment.

The branch office **Theo Seulberger, Karlsruhe** with the same line of products sells chemical products to customers in the South of Germany and in adjoining European countries.

As an established and versatile enterprise, the A. + E. Fischer-Chemie group courageously and competently faces the challenge posed by the topical requirements of their customers as well as the chemical industry, and is looking forward to the new opportunities of the European market.
