

It's good to know your business partners well!

Expanding experience every day.

Silbermann does so since 1868.

Creativity and readiness to innovation are – and have always been – the basis for our continually expanding product portfolio and service range. Until this day we are an independent, medium-sized, family-owned company – and one of the most efficient suppliers for chemical products in South Germany.

Fast, flexible, unbureaucratic and competent – these are the very qualities our clients appreciate most. The service range of our company sectors is wide, but highly specialized: From consultation and analysis up to every single chemical product.
