It's good to know your business partners well!

Tennants Distribution United Kingdom and Ireland

With our history dating back to 1797 the Tennant Group has developed into a successful, privately owned, chemical company based in the UK, involved predominantly in the manufacture and distribution of chemicals. Group annual turnover is approximately 300 Mio. € employing over 800 people worldwide.

A key part of the Group is distribution covering UK & Ireland where we have an extensive network of depots making us one of the UK's leading chemical distribution companies.

Currently, we are distributors for some of the world's leading chemical manufacturers stocking over 2,500 products in various package sizes and in many cases able to offer the product in bulk.

Through years of working in partnership with major customers and suppliers we have developed supply chain solutions for both customers and suppliers that are able to match the best.

We subscribe to „The Responsible Care Scheme“ promoted by our Industry's Association and are committed to assisting our customers in the safe use and handling of the chemicals which we supply. Our distribution centres are all accredited with ISO 9001:2000 quality standards.
